

ES Data Burst Feb 2013

Update on TNWG Emergency Services in 3 minutes or less...

Ground Team Training – There will be an advanced ground team training event at Big Hill Pond in Group 4 on Feb 22-24. This will be an outdoor overnight event. Emphasis will be placed on cold weather preparedness and suitable equipment/provisions for overnight operations without resupply. Please see the event site at <http://sites.google.com/a/tncap.us/big-hill-pond-gtx/> for details and to pre-register.

ES School – The ES school will proceed as planned in Sparta Tennessee on March 8 - 11. Topics will include Ground, Air and Staff Tasks. There will be detailed announcements and an event site as the date approaches.

Event Pre-registration – The wing has moved to a new web address. The main page is at <http://www.tncap.us/> There are specific sites for each event under the events menu item on the left side of the page. There is a specific site for Emergency Services at <http://es.tncap.us/> If you have not received an email with login information please send email to it@tnwg.cap.gov for details.

Budget Issues – We still have not received word on our funding going forward. Until there is a release of funds into our training account we will be proceeding with a reduced number of events and reduced budgets for the events that do occur. We will try to stick to the dates on the published calendar as much as we can. Please continue to check the calendar on the wing web page at <http://www.tncap.us/> for specific details. The Mountain Flying Clinic has been delayed until the budget allows for it to be fully funded.

SER OPS Conference – The wing operations staff attended the South East Region conference last month. We learned that our response to the budget issue is in line with other wings. Despite the funding issues our requirements for hours on the airplanes will not be reduced. There was a good discussion on new customers and new taskings. We will be pursuing several possibilities to increase our taskings from other agencies. Please send any ideas for customers or taskings we might want to pursue to es@tnwg.cap.gov.

FY13 Actual Missions - Tennessee Wing has 2 finds

12-M-0721A	12/04/12	Missing aircraft departed FGU. Found by TN Wing aircrew, pilot deceased.
12-M-0725	12/06/12	406 ELT w/ GPS in Sullivan County. Beacon ceased before it was found.
12-M-0733	12/13/12	Found in hanger at Fort Campbell by TN Wing ground team.
